New Portable Solar Air Heating From US Solar Heating

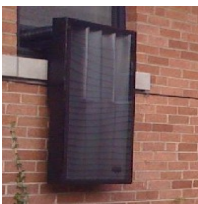

US Solar Heating proudly introduces two new solar air heating products to supplement their wall and roof installation systems. These new products continue US Solar Heating's mission to make solar heaters affordable and easy for anybody who wants to use solar thermal energy.

Portable Unit

Pick up and go on the road with the renewable power of solar energy. Weighing in at 10 lbs this unit delivers output temperatures of up to 130 degrees Fahrenheit. It is designed to be used in an RV, boat, camper, pop-up, tent, etc.

Have Solar Air Heater – Will Travel

Window Unit

Want to add solar heat to your condo or apartment but your building will not allow you to drill holes through a wall or roof. The new Window Unit from US Solar Heating is the perfect solution for you. It is the easiest way to add solar air heating to your a residence. There is no installation needed. Just set it on your windowsill and forget it.

US Solar Heating manufactures solar air heaters made for anybody who wants to add solar energy to their energy system. Call 866-361-2638 or email dan@ussolarheating.com to learn more about our line of products. We ship anywhere in the US and Canada.
